

Journals to keep in mind for submissions

High impact

- [Nature](#) - Top-tier journal. Requires very thorough, impactful science
- [Science](#) - Top-tier journal. Requires very thorough, impactful science
- [PNAS](#) - Upper 2nd-tier journal.

Agriculture

- The Plant Genome
- Nature Biotechnology
- The Crop Journal

Microbiome

- Nature Microbiology
- Applied and Environmental Microbiology
- Phytobiomes

Conferences that are good to attend

Agriculture

- [Maize Meeting](#) - Annual meeting of maize genetics held every March at rotating locations. (Application deadline is in January.)
- [Plant and Animal Genome \(PAG\)](#) - The biggest agriculture genomics conference there is. Held every January in San Diego. (Application deadline in Oct/Nov.) All the big players (academic & industry) are there, but it can be *too* big: hard to find specific people you want to talk with.
- [CROPS](#) - A smaller conference organized by UGA faculty every 2(?) years in June. (Application deadline in February.) Tends to have an impressive list of invited speakers.
- ASBP

Microbiome

- Phytobiomes - Irregular(?) conferences held every year or two in various locations,.

Bioinformatics
